Thanks to money raised by the Friends of the Red Wing Public Library, Red Wing residents are now able to borrow the Internet just like a book. Mobile hotspots provide 24/7 access to the Internet with unlimited data on a fast, secure network. A mobile hotspot is a portable device that provides internet access to any Wi-Fi enabled device within approximately 30 feet. Hotspots rely on mobile broadband service from a cellular provider to provide 3G or 4G LTE coverage.

The ability to use the Internet has become increasingly important in all facets of daily life, yet not everyone has easy or affordable access to this technology. The purpose of circulating mobile hotspots is to narrow the digital divide by providing our patrons with greater access to the Internet away from the library. This furthers Red Wing Public Library's mission to serve the informational, educational, recreational, and technological needs of our diverse community.
