

## FOLD YOUR OWN BERTIE BOTT'S EVERY FLAVOUR BEANS BOX!

1. Cut the box out. When cutting the bottom flaps, cut up to the box bottom using the dotted lines as a guide. Do NOT cut the flaps off. This will form the box feet!
2. Cut the white windows out of your box. You can either put the cellophane bag of beans right into the box when it's folded, or you can cut and attach cellophane windows. To cut the windows, empty the beans from the cellophane bag. Cut the cellophane to fit each window with enough overlap that you'll be able to glue or tape it down to the cardstock. This doesn't need to be too tidy, since it will be taped down on the inside of the box. Place your cellophane over the corresponding windows on the inside of the box. Glue or tape it down (we think tape is easier, but it's up to you!).
3. Fold and crease each side and flap of your box. Fit the bottom of the box together. Glue or tape the flaps together to secure the bottom.
4. The side flap goes to the inside of the box. Glue or tape the flap on the inside to secure it.
5. Fill your box with Every Flavour Beans\* and enjoy... with caution, of course!

\* At Hermione's request for our honesty, and in the interest of your full enjoyment of your evening, we solemnly swear that the enclosed beans are actually Jelly Bellies, which means you're safe from boogies, vomit, and earwax-flavoured beans.
