

## RECIPE: Butterbeer Float

### INGREDIENTS:

Cream or vanilla soda, vanilla ice cream, butterscotch syrup,  
vanilla or rum extract, and whipped cream for topping

### INSTRUCTIONS:

Put your favorite glass or mug in the freezer to chill while you prepare your butterbeer.  
Combine 2 scoops of ice cream, 2 tablespoons of butterscotch syrup, and 1 / 4 teaspoon of  
vanilla or rum extract in a blender or large bowl. Blend or mix until combined. If you're  
not using a blender, wait for the ice cream to soften a bit—it will make it easier to mix.  
Pour the ice cream mixture into your chilled glass. Slowly pour the soda over your ice  
cream until your glass is almost full. Top with whipped cream, drizzle with more  
butterscotch, and enjoy!
